SUMMARY

Software Engineering Manager with over 10 years of development experience. Skilled in Vue, Node.js and AWS Amplify. Through this time, I have learned how to manage and develop projects by asking and understanding what is the business value, knowing the business roadmap and collaborating with fellow team members on how to achieve this in order for everyone to be successful!

EXPERIENCE

Software Engineering Manager

DIGITAL SEAT MEDIA, Dallas, TX

Feb 2018 - May 2023

- Held daily meetings with the product team in order to develop 3 large company web applications.
- Managed, mentored, and supported 3 junior developer team members.
- Set standard development guidelines that team members could apply and work quickly.
- Conducted weekly meetings with the backend team members to discuss what API was needed.
- Reviewed fundamental concepts and executed Vue.js, Nuxt.js, Element UI, Chart.js, Jest (unit testing), HTML, CSS, Tailwind CSS.

Senior Software Developer

INTEGRAL AD SCIENCE, New York, NY

Feb 2016 - Oct 2019

- Converted a large innovative Ad Tech platform to use AngularJS and Material UI design so that design patterns could be applied across multiple projects.
- Collaborated with up to 7 UI/UX design team members providing development feedback in order to meet sprint timelines.
- Developed the UI that allowed Salesforce to increase sales by 25% by automating the onboard of new customers to the company platform.
- Executed Angular.js, Angular Material, Chart.js, Jest (unit testing), HTML, CSS.

Senior Software Developer

SIZMEK, Austin, TX

July 2014 - Jan 2016

- Developed a drag and drop UI tool that improved the visual workflow of ad targeting by 100% and allowed advertisers to easily create targeted ads through various criteria such as gender, race, or geo location.
- Collaborated with a team of remote developers.
- Ensured deliverable milestones were met.
- Executed Angular.js, Jest (unit testing), HTML, CSS.

Software Developer

iVERSE MEDIA LLC, Austin, TX

Oct 2012 - Jul 2014

- Increased comic translation up to 90% by developing a comic editor that could be used by third-party translation companies.
- Developed an internal CMS to manage the company site and comics that could be delivered.
- Developed sites for external retail comic stores.
- Managed and developed an API that is provided for communicating with the CMS.
- Executed PHP, MySQL, Angular.js, HTML, CSS.
